

Samir Bhusal

samir.masterprep@gmail.com | bhusalsamir.com.np | github.com/samirbhusal

Education

Dakota State University | Madison, SD

August 2025 – Present

Master of Science, Information Systems

Purbanchal University | Kathmandu, Nepal

October 2017 – October 2022

Bachelor of Science, Computer Applications

Project: Created ecommerce platform with product categories, search, add to cart, payment integration (Khalti) using python Django Framework and SQLite.

Projects

Personal Portfolio Website	HMTL, CSS, JavaScript, React.js, Vite, Tailwind, Vercel
Built and deployed a responsive React (Vite) portfolio with reusable components, and Vercel CI/CD + custom domain setup.	
Python-BDD-Automation Framework	Python, Behave, Selenium, Page Object Model
Developed a scalable Python Behave + Selenium POM framework with multi-browser & environment-driven execution	
RAG LLM Chatbot	Python, LangChain, OpenAI, Streamlit.io
Developed a RAG chatbot for intelligent incident query resolution using internal documents.	
Memory Card Game	React.js, Vite, Axios, React Hooks, TypeScript, GitHub Pages
Developed a responsive memory game using React and TypeScript, leveraging Axios interceptors to manage asynchronous data fetching from the PokéAPI.	
CV App	React.js, TypeScript, Vite, GitHub Pages
Developed a dynamic single-page application using React and TypeScript to create professional resumes through a modular, section-based interface.	

Experience

Graduate Research Assistant | Dakota State University, Madison, SD

August 2025 – Present

- Designed an interactive [Figma prototype](#) (“Helpdesk RAG Assistant”) showcasing an AI-powered incident resolution system and performance dashboard and presented at the Siouxland IT Symposium.
- Tools/Skills:** Figma, Wireframing, Prototyping, UX/UI Design, Interaction Design, Smart Animate, AI Product Design, Dashboard Visualization, User Flow
- Supported faculty research by building and maintaining a literature matrix.
- Assisted in evaluating Python-based analytics projects and assignments by making rubric and grading

Software Engineer – Quality Assurance | Deerhold Ltd., Kathmandu, Nepal

November 2022 – August 2025

- Maintained automated test coverage of more than 90 percent and pass rate over 95 percent for [Higi platforms](#) using BDD Cucumber framework with Selenium, Appium and Java for mobile and web platforms with reduced release cycle by 30%.
- Developed and maintained test automation for the mobile app (Android, iOS) ([InStride Health](#)) with 80 percent automation coverage using BDD Cucumber framework with Selenium, Appium and Java.
- Managed QA processes and rebuild of legacy system, achieving production readiness in 3 months for [Wellness Portal](#).
- Managed test planning, execution, reporting, and product release documentation and performed manual and automation test execution.
- Collaborated in agile ceremonies ensuring alignment with cross-functional teams for continuous improvement.

Technical Skills

Languages: Python, SQL, Gherkin

Frameworks: Selenium, Appium, Karate, Cucumber (BDD), JUnit, TestNG, Behave, React.js, Vite

Cloud & Tools: Git, GitHub, JIRA, Confluence, BrowserStack, Android, iOS, Excel, Power BI

Methodologies: Manual Testing, Regression, Smoke, UAT, SDLC, STLC, Agile/Scrum, cross-browser and responsive testing

Documentation: Test Plans, Test Cases, Bug Reports, Release Notes

Achievements / Awards

- Winnter of Hult Prize Purbanchal University 2020
