

SAMIR BHUSAL

SDET / QA Automation Engineer

samir.masterprep@gmail.com | linkedin.com/in/samirbhusal | github.com/samirbhusal | bhusalsamir.com.np

QA Automation Engineer with 3 years building BDD test automation frameworks (Playwright, Selenium, Appium) for regulated healthcare/biotech platforms and building CI/CD-integrated regression suites in Azure DevOps to streamline continuous testing.

TECHNICAL SKILLS

Languages: Java, TypeScript, SQL, Gherkin

Test Automation: Playwright, Playwright-BDD, Selenium, Appium, Cucumber

Tools & Platforms: Git, GitHub Actions, Azure DevOps (Pipelines & Test Plans), JIRA, BrowserStack, Postman, Allure Report

Testing & Methodologies: API, Regression, Smoke, UAT, Cross-Browser/Cross-Platform, Agile/Scrum, SDLC, STLC, CI/CD

EXPERIENCE

Software QA Automation Intern | Bio-Techne, Minneapolis, MN

June 2026 – Aug 2026

- Architected a multi-environment (Dev/QA/UAT) **Playwright + TypeScript + Playwright-BDD** framework using Page Object Model and Domain-Driven Design, enabling the team to scale automated coverage across a growing multi-product platform with **Allure Report** dashboards for stakeholder-facing test visibility.
- Designed the CI strategy for two purpose-built **Azure DevOps** pipelines (PR/smoke validation and nightly regression), auto-triggered via PowerShell from the Classic Release Pipeline to run test suites automatically on deployment completion.
- Integrated Playwright with **Azure Test Plans** (via playwright-azure-reporter), syncing automated pass/fail results to Test Cases in real time — replicating Jira Xray-style traceability and eliminating manual test-result reporting for stakeholders.
- Built Playwright MCP-powered **Claude Code skills** (/draft-scenarios, /implement-step) that read the live application UI to auto-draft Gherkin scenarios and generate matching step definitions and playwright POM code.
- Delivered a Playwright framework walkthrough to the full Bio-Techne IT org (Denver + MN sites) on how to integrate test automation process as part of SDLC.

Graduate Research Assistant | Dakota State University, Madison, SD

Aug 2025 – May 2026

- Designed an AI helpdesk assistant prototype to speed up incident-resolution workflows as part of an internal analytics research initiative.
- Maintained the literature matrix and evaluated Python analytics projects supporting an XAI healthcare research study.
- Co-developed grading rubrics and graded coursework for an undergraduate analytics course each term.

Software Engineer – Quality Assurance | Deerhold Ltd., Kathmandu, Nepal

Nov 2022 – Aug 2025

- Maintained BDD automation framework for [Higi](#) platforms (web + mobile) using Selenium, Appium, and Java, achieving 95% regression automation coverage, 90%+ pass rate, and reducing release cycle time by 30%.
- Designed and maintained BDD test automation framework for [InStride Health](#) (mobile app – Android & iOS) with 80% automation coverage using Appium and Java.
- Executed API tests to prepare test data and preconditions for web and mobile automation execution
- Led QA for a legacy [Wellness Portal](#) rebuild, taking it from rebuild to production readiness in 3 months.
- Served as the primary QA point of contact for US-based clients, authoring release quality reports from Jira defect data and BrowserStack cross-device results, giving stakeholders the data needed to make confident release decisions.

PROJECTS

Playwright BDD Automation Framework | TypeScript, Playwright, Cucumber | [Link](#)

- Built a scalable Playwright BDD framework with UI/API testing, multi-browser execution, BrowserStack integration, and Allure reporting.

Full Stack RAG Chatbot | React, Python, FastAPI, LangChain, Pinecone, Groq (Llama-3.3), HuggingFace | [Link](#)

- Built a RAG chatbot for intelligent incident query resolution over internal documents.

Python BDD Automation Framework | Python, Behave, Selenium, Page Object Model | [Link](#)

- Built a scalable Python Behave + Selenium POM framework with multi-browser and environment-driven execution.

EDUCATION

MS, Information Systems | Dakota State University, Madison, SD

Aug 2025 – Dec 2026 (Expected)

BS, Computer Applications | Kantipur City College, Kathmandu, Nepal

Oct 2017 – Oct 2022

- Winner, Hult Prize — Purbanchal University (2020) | [Link](#)
