SUMMARY

Software QA Engineer / SDET with 3+ years building BDD test automation frameworks (Playwright, Selenium, Appium, Cucumber) for regulated healthcare/biotech platforms, cutting release cycle time 30% through CI/CD-integrated Azure DevOps pipelines.

TECHNICAL SKILLS

Languages: Java, TypeScript, SQL, Gherkin

Test Automation: Playwright (Java, TypeScript), Playwright-BDD, Selenium, Appium, Cucumber, TestNG, Behave

Tools & Platforms: Git, GitHub Actions, Azure DevOps (Pipelines & Test Plans), JIRA, BrowserStack, Postman, Allure Report

Testing & Methodologies: API Testing, Manual Testing, Regression Testing, Smoke Testing, UAT, Cross-Browser & Mobile Testing, Software Testing, Quality Assurance, Agile Methodologies (Scrum), SDLC, STLC, CI/CD

EXPERIENCE

Software QA Automation Intern — Bio-Techne

Jun 2026 – Aug 2026

Minneapolis, MN

- Delivered 130+ automated Playwright/TypeScript test cases across 2 of the platform's 13 products within a 10 week internship, architecting a multi-environment (Dev/QA/UAT) BDD framework (Page Object Model + Domain-Driven Design) built to scale to the remaining product lines.
- Designed the CI strategy for two purpose-built Azure DevOps pipelines (PR/smoke validation and nightly regression), auto triggered via PowerShell from the Classic Release Pipeline, to catch regressions pre-merge without slowing developer velocity.
- Integrated Playwright-BDD with Azure Test Plans (via playwright-azure-reporter), syncing automated pass/fail results to Test Cases in real time — replicating Xray-style traceability and eliminating manual test-result reporting for stakeholders.
- Built Playwright MCP-powered Claude Code skills that read the live application UI to auto-draft Gherkin scenarios and generate matching Playwright step code, cutting the time to turn a UI walkthrough into reviewable automated test coverage.
- Evaluated Katalon Studio, BrowserStack Low-Code Automation, and Leapwork against the existing framework and presented findings to guide the team's automation tooling strategy; delivered a Playwright framework walkthrough to the full Bio-Techne IT org.

QA Engineer → Associate SDET → SDET — Deerhold Ltd.

Nov 2022 – Aug 2025

Kathmandu, Nepal

- Built and maintained BDD automation frameworks (Java, Selenium, Appium, Cucumber) for Higi (web + mobile) and InStride Health (iOS/Android), reaching 95%/80% regression coverage and a 90%+ pass rate, which cut release cycle time by 30%.
- Led QA for a legacy Wellness Portal rebuild, taking it from rebuild to production readiness in 3 months.
- Served as the primary QA point of contact for US-based clients, authoring release quality reports from Jira defect data and BrowserStack cross-device results, and delivering signoffs that directly informed go/no-go release decisions.
- Executed REST API tests (Postman, JSON payloads) to validate service responses and prepare test data/preconditions for web and mobile automation execution.

Graduate Research Assistant — Dakota State University

Aug 2025 – May 2026

Madison, SD

- Designed an AI helpdesk assistant prototype to speed up incident-resolution workflows as part of an internal analytics research initiative.
- Maintained the literature matrix and evaluated Python analytics projects supporting an XAI healthcare research study.
- Co-developed grading rubrics and graded coursework for undergraduate analytics course each term.

PROJECTS

Playwright-Java-BDD (in progress) | Java, Playwright, Cucumber, TestNG, Maven | [Link](#)

- Building a config-driven BDD framework with thread-local Playwright lifecycle management, random cross-browser selection, and environment-based configuration.

Playwright BDD Automation Framework | TypeScript, Playwright, Cucumber | [Link](#)

- Scalable BDD framework with UI/API testing, multi-browser execution, BrowserStack integration, Allure reporting.

Full Stack RAG Chatbot | React, Python, FastAPI, LangChain, Pinecone, Groq (Llama-3.3), HuggingFace | [Link](#)

- Built a RAG chatbot for intelligent incident query resolution over internal documents.

EDUCATION

MS, Information Systems — Dakota State University

Aug 2025 – Dec 2026 (Expected)

BCA, Computer Science — Purbanchal University

Oct 2017 – Oct 2022

Achievements: Winner, Hult Prize — Purbanchal University (2020)
